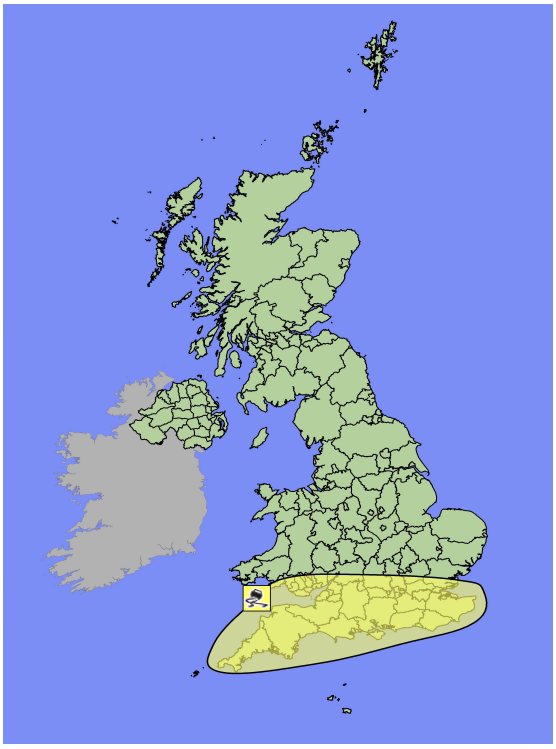
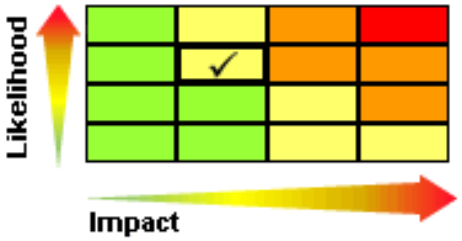
National Severe Weather Warning Service





Chief Forecasters Assessment
Further slight accumulations of snow are possible into the early hours of Wednesday morning. As temperatures fall under clearing skies, ice becomes the main concern, particularly as lying and melted snow refreezes.

The Met Office have issued a **Yellow Alert** of **Ice**

Valid from **00:05 on Wed, 23rd Jan 2013** until **12:00 on Wed, 23rd Jan 2013**

Outbreaks of sleet and snow will gradually die out on Tuesday night and as temperatures fall, icy stretches will form on many untreated roads, these lasting well into Wednesday morning. The public are advised to take extra care.
